Introduction

To help us understand the health of study participants during the COVID-19 pandemic, we would like to ask you additional questions about your possible exposure to this new virus.

The interview may take as little as 5 minutes, or as much as 30 minutes, depending on whether or not you have been diagnosed with COVID-19.

This information will be handled in the same way as the other data we have collected by phone. If you’d like, I can review that information with you now. (Review initial phone consent if participant says they need it).

Who is completing the survey: Participant or Proxy?

- Participant
- Proxy

Would it be okay to ask you questions about COVID-19 related experiences today?

- Yes - okay to ask
- No - not okay to ask

In the future, may we call you again to see how you’re doing and ask you these questions again?

- Yes - okay to call again
- No - do not call again
