

Data Collection Worksheet

Please Note: The Data Collection Worksheet (DCW) is a tool to aid integration of a PhenX protocol into a study. The PhenX DCW is not designed to be a data collection instrument. Investigators will need to decide the best way to collect data for the PhenX protocol in their study. Variables captured in the DCW, along with variable names and unique PhenX variable identifiers, are included in the PhenX Data Dictionary (DD) files.

This protocol is part of a computer-assisted personal interview. The PhenX Anthropometrics Working Group recommended that this could also be used as a paper-and-pencil personal interview and may be a self-administered interview.

The following are the two questions for this protocol:

How tall {are you/is [participant]*} without shoes?
