

Data Collection Worksheet

Please Note: The Data Collection Worksheet (DCW) is a tool to aid integration of a PhenX protocol into a study. The PhenX DCW is not designed to be a data collection instrument. Investigators will need to decide the best way to collect data for the PhenX protocol in their study. Variables captured in the DCW, along with variable names and unique PhenX variable identifiers, are included in the PhenX Data Dictionary (DD) files.

Patients rate their overall experience with various aspects of restless legs syndrome, including discomfort in arms or legs, need for movement, and sleep disturbance. Each question is scored on a scale of none (0) to very severe (4).
