

## Data Collection Worksheet

**Please Note:** The Data Collection Worksheet (DCW) is a tool to aid investigators to integrate the collection of PhenX measures in your study. The PhenX measures that you selected and added to your Cart are presented in the DCW in alphabetical order. The DCW includes worksheets for data collection. Variables derived from the collected data are shown in the Data Dictionary (DD) with variable names and unique PhenX variable identifiers. The collection of DCWs produced by the Toolkit is not designed as a data collection instrument. Each investigator will decide how to integrate PhenX measures into data collection for their study.

The PANAS-X scale and scoring are available on the University of Iowa's Department of Psychology website. The scale is copyrighted by Dr. David Watson and Dr. Lee Anna Clark. Permission to reproduce the instrument is granted for non-commercial applications only; any commercial use would require the express written permission of the copyright holders.

Dr. Watson and Dr. Clark are professors in the Department of Psychology at the University of Notre Dame.
