

## Data Collection Worksheet

**Please Note:** The Data Collection Worksheet (DCW) is a tool to aid integration of a PhenX protocol into a study. The PhenX DCW is not designed to be a data collection instrument. Investigators will need to decide the best way to collect data for the PhenX protocol in their study. Variables captured in the DCW, along with variable names and unique PhenX variable identifiers, are included in the PhenX Data Dictionary (DD) files.

### Summary of the Conflict Tactics Scales: Parent-Child (CTS PC)

The Conflict Tactics Scales: Parent-Child Version (CTS PC) includes 35 items focused on the respondent's behavior with his or her child as well as the parent's own experiences as a child. The scale provides scores for:

- - Nonviolent discipline
- - Physical assault
- - Neglect
- - Psychological aggression
- - Weekly discipline
- - Sexual abuse

### Example

Items from the Conflict Tactics Scales: Parent-Child Version (CTS PC) include explaining to the child why something he or she did was wrong, sending the child to time out, threatening the child with a knife or gun, and calling the child hurtful names. Response options capture the number of times (such as never, once, twice, etc.) specific disciplinary strategies were used during the past year.

### Scoring Instructions

For each item, the respondent indicates the number of times the event has occurred in the past year. The responses are summed for all questions with higher scores indicating more psychological and physical abuse.
