

## Data Collection Worksheet

**Please Note:** The Data Collection Worksheet (DCW) is a tool to aid integration of a PhenX protocol into a study. The PhenX DCW is not designed to be a data collection instrument. Investigators will need to decide the best way to collect data for the PhenX protocol in their study. Variables captured in the DCW, along with variable names and unique PhenX variable identifiers, are included in the PhenX Data Dictionary (DD) files.

Jeremy Fairbank is the owner of the Oswestry Disability Index (ODI ©) and version 2.1a of the instrument is available from the PROQOLID database ([www.proqolid.org](http://www.proqolid.org)). Registration, as well as a user agreement, may be required for database access. Additionally, depending upon the type of research, a fee may be charged. The PROQOLID database was created by Mapi Research Trust, 2001-2014, All rights reserved.

Each item of the Oswestry Disability Index (ODI ©) focuses on a certain activity such as walking, lifting, and personal care (i.e., washing, dressing etc.). The respondent reports how their back (or leg) trouble has affected their ability to perform each of the activities on the day the ODI © is completed.
