

Data Collection Worksheet

Please Note: The Data Collection Worksheet (DCW) is a tool to aid integration of a PhenX protocol into a study. The PhenX DCW is not designed to be a data collection instrument. Investigators will need to decide the best way to collect data for the PhenX protocol in their study. Variables captured in the DCW, along with variable names and unique PhenX variable identifiers, are included in the PhenX Data Dictionary (DD) files.

The Child Behavior Checklist for School-Age Children (Ages 6 - 18) is a form to rate concerns about a child's emotional and behavioral functioning. Scores can be compared against multicultural, age, and gender norms. Forms are available for completion by the child's parent/caregiver (CBCL/6-18), the child's teacher (TRF/6-18), or by the child (YSR/11-18).

The Child Behavior Checklist for Ages 6 - 18 is a proprietary protocol, and administration requires a license from ASEBA®.
