

## Data Collection Worksheet

**Please Note:** The Data Collection Worksheet (DCW) is a tool to aid integration of a PhenX protocol into a study. The PhenX DCW is not designed to be a data collection instrument. Investigators will need to decide the best way to collect data for the PhenX protocol in their study. Variables captured in the DCW, along with variable names and unique PhenX variable identifiers, are included in the PhenX Data Dictionary (DD) files.

1. Record the actual number and percent of persons excluded from your study.

---

2. Report the percent of eligible participants who agree to participate in your study.

---

3. Compare differences between those participating and those not participating on illness status, sociodemographics, geography, and other key variables.

---

4. Record reasons that participants refused to participate in the study.

---
