

Data Collection Worksheet

Please Note: The Data Collection Worksheet (DCW) is a tool to aid integration of a PhenX protocol into a study. The PhenX DCW is not designed to be a data collection instrument. Investigators will need to decide the best way to collect data for the PhenX protocol in their study. Variables captured in the DCW, along with variable names and unique PhenX variable identifiers, are included in the PhenX Data Dictionary (DD) files.

The European Organisation for the Research and Treatment of Cancer (EORTC) Quality of Life Questionnaire - Core 30 (QLQ-C30) © was developed to assess the quality of life in cancer patients. It is a copyrighted instrument, which has been translated and validated in over 110 languages and has been used in more than 3,000 studies worldwide. Presently QLQ-C30 Version 3.0 © is the most recent version and should be used for all new studies.

The instrument is freely available if your study is purely for academic use. For each study, researchers are required to have an Academic User Agreement in order to use EORTC protocols.

Studies with commercial sponsorship are required to have a Commercial User Agreement in order to use this protocol, and a fee is requested dependent on the number of patients in the study.

In order to obtain the QLQ-C30 and associated modules, obtain the permission via the download process on the EORTC website <https://qol.eortc.org/questionnaires/>.
