

Data Collection Worksheet

Please Note: The Data Collection Worksheet (DCW) is a tool to aid integration of a PhenX protocol into a study. The PhenX DCW is not designed to be a data collection instrument. Investigators will need to decide the best way to collect data for the PhenX protocol in their study. Variables captured in the DCW, along with variable names and unique PhenX variable identifiers, are included in the PhenX Data Dictionary (DD) files.

Summary of the Dimensional Change Card Sort (DCCS) Border Version

The DCCS Border Version makes use of two different styles of bivalent cards, displaying, for example, a red boat and blue rabbit. The test cards additionally have either no border or a black border.

The protocol consists of the research assistant preparing the administration on an iPad, where data are transmitted via the Internet to the Apple iCloud for download by the investigator.
