

Data Collection Worksheet

Please Note: The Data Collection Worksheet (DCW) is a tool to aid integration of a PhenX protocol into a study. The PhenX DCW is not designed to be a data collection instrument. Investigators will need to decide the best way to collect data for the PhenX protocol in their study. Variables captured in the DCW, along with variable names and unique PhenX variable identifiers, are included in the PhenX Data Dictionary (DD) files.

The Substance Abuse and Addiction Scientific Panel (SSP) acknowledges that the following questions may gather sensitive information relating to HIV status. If the information is released, it might be damaging to an individual's employability, lead to social stigmatization, or lead to other consequences.

SAY: Now I'm going to ask you a few questions about getting tested for HIV. Remember, an HIV test checks whether someone has the virus that causes AIDS.

Q1. Have you ever been tested for HIV?

0 [] No

1 [] Yes

7 [] Refused to answer

9 [] Don't know

If Q1 = 0, skip to Q4.

If Q1 = 1, proceed to Q2.

If Q1 = 7 or 9, end protocol.

Q2. When did you have your most recent HIV test?

___/___/___

(MM/YYYY)

[77/7777 = Refused, 99/9999 = Don't know]

Q3. What was the result of your most recent HIV test? ***[DO NOT Read choices,***

check only ONE.]

- 1 Negative
- 2 Positive
- 3 Never obtained results
- 4 Indeterminate
- 7 Refused to answer
- 9 Don't know

INTERVIEWER INSTRUCTIONS: Refer to Q2. LAST HIV TEST WAS DONE (Check one):

≤ 12 months ago. [] End protocol

> 12 months ago. [] Go to Q4

Date of last test Don't know/Refused. . . [] End protocol

[PERSONS WHO HAVE NEVER TESTED HIV+ AND HAVE NOT TESTED FOR HIV IN THE PAST 12 MONTHS]

Q4. I'm going to read you a list of reasons why some people have not been tested for HIV. Which of these best describes the most important reason you have not been tested for HIV in the past 12 months? **[READ CHOICES. CHOOSE only ONE.]**

- 1 You think you are at low risk for HIV infection?
- 2 You were afraid of finding out that you had HIV?
- 3 You didn't have time?
- 4 Some other reason?
- 5 No particular reason
- 7 Refused to answer
- 9 Don't know

End protocol.

The SSP has selected specific questions from the original protocol text, which is available in its entirety in the PhenX measure Comprehensive HIV Risk

Assessment, found in the Substance Abuse and Addiction Specialty collections. The SSP removed the following questions from the HIV Testing Experiences (HT) section of the protocol: HT-2, HT-3, HT-4a, HT-4b, HT-5, and HT-6a through HT-13. These items were not critical to this brief assessment of HIV testing status. As a result, the remaining questions have been renumbered (Q1-Q4), and some of the skip patterns have been modified to direct the interviewer to the end of the series of questions.
