

Data Collection Worksheet

Please Note: The Data Collection Worksheet (DCW) is a tool to aid investigators to integrate the collection of PhenX measures in your study. The PhenX measures that you selected and added to your Cart are presented in the DCW in alphabetical order. The DCW includes worksheets for data collection. Variables derived from the collected data are shown in the Data Dictionary (DD) with variable names and unique PhenX variable identifiers. The collection of DCWs produced by the Toolkit is not designed as a data collection instrument. Each investigator will decide how to integrate PhenX measures into data collection for their study.

Summary of the Primary Care PTSD screen for DSM-5

The PC-PTSD for DSM-5 includes an introductory statement about potentially traumatic events followed by 5 yes/no questions that capture:

- Nightmares or unwanted thoughts about the event
- Not thinking about or avoiding situations that remind participant of the event
- On guard, watchful, or easily startled
- Felt numb or detached
- Felt guilty or unable to stop blaming oneself or others for event

Scoring:

The results of the PC-PTSD should be considered "positive" if a patient answers "yes" to any three items.

Availability:

The PC-PTSD screen for DSM-5 is available from the National Center for PTSD at www.ptsd.va.gov.
