Data Collection Worksheet

Please Note: The Data Collection Worksheet (DCW) is a tool to aid investigators to integrate the collection of PhenX measures in your study. The PhenX measures that you selected and added to your Cart are presented in the DCW in alphabetical order. The DCW includes worksheets for data collection. Variables derived from the collected data are shown in the Data Dictionary (DD) with variable names and unique PhenX variable identifiers. The collection of DCWs produced by the Toolkit is not designed as a data collection instrument. Each investigator will decide how to integrate PhenX measures into data collection for their study.

Summary of the Beck Hopelessness Scale

The Beck Hopelessness Scale (BHS) consists of 20 self-report true-false statements that assess the respondent’s positive and negative beliefs about the future during the past week. Each optimistic response is scored as 0 and each pessimistic response is scored as 1. A total score is calculated by summing the pessimistic responses for each of the 20 items.

The Beck Hopelessness Scale (BHS) is a proprietary instrument. Administration/use of the BHS requires a licensing agreement from Pearson. Researchers should complete and return an application to pas.licensing@pearson.com.

The Beck Hopelessness Scale is a proprietary instrument and can be obtained through:
