

Data Collection Worksheet

Please Note: The Data Collection Worksheet (DCW) is a tool to aid integration of a PhenX protocol into a study. The PhenX DCW is not designed to be a data collection instrument. Investigators will need to decide the best way to collect data for the PhenX protocol in their study. Variables captured in the DCW, along with variable names and unique PhenX variable identifiers, are included in the PhenX Data Dictionary (DD) files.

The Yale-Brown-Cornell Eating Disorder Scale (YBC-EDS) is an interviewer-administered scale that can assess an individual's unique symptoms within the wide range of eating-related preoccupations and behaviors found with eating disorders. It provides an 16-item standardized measure of the severity of symptom impairment, as well as measurements of desire for change, global severity, and global change over time. Inter-rater reliability, validity, and internal consistency have been demonstrated.

The Yale-Brown-Cornell Eating Disorder Scale (YBC-EDS) is available from Dr. Carolyn M. Mazure:

Carolyn M. Mazure, Ph.D.
