

Data Collection Worksheet

Please Note: The Data Collection Worksheet (DCW) is a tool to aid integration of a PhenX protocol into a study. The PhenX DCW is not designed to be a data collection instrument. Investigators will need to decide the best way to collect data for the PhenX protocol in their study. Variables captured in the DCW, along with variable names and unique PhenX variable identifiers, are included in the PhenX Data Dictionary (DD) files.

Description of the Harm Avoidance Subscale of the Temperament and Character Inventory (TCI)

The Harm Avoidance subscale of the Temperament and Character Inventory (TCI) includes 35 true/false questions on anticipatory worry, fear of uncertainty, shyness, and fatigability. Responses to individual questions are added together, and higher scores indicate greater impairment.
