Data Collection Worksheet

Please Note: The Data Collection Worksheet (DCW) is a tool to aid investigators to integrate the collection of PhenX measures in your study. The PhenX measures that you selected and added to your Cart are presented in the DCW in alphabetical order. The DCW includes worksheets for data collection. Variables derived from the collected data are shown in the Data Dictionary (DD) with variable names and unique PhenX variable identifiers. The collection of DCWs produced by the Toolkit is not designed as a data collection instrument. Each investigator will decide how to integrate PhenX measures into data collection for their study.

Scoring: Items can be scored individually to derive a score for the corresponding domain or all the scores for all items can be summed and averaged to form the Personal Wellbeing Index (PWI). To create scores that can be compared with one another, the ratings can be converted to a 0- to 100-point scale by shifting the decimal point one place to the right (e.g., a score of 6.5 becomes 65%).
