

Data Collection Worksheet

Please Note: The Data Collection Worksheet (DCW) is a tool to aid integration of a PhenX protocol into a study. The PhenX DCW is not designed to be a data collection instrument. Investigators will need to decide the best way to collect data for the PhenX protocol in their study. Variables captured in the DCW, along with variable names and unique PhenX variable identifiers, are included in the PhenX Data Dictionary (DD) files.

The Structured Clinical Interview for DSM-5® Disorders-Clinician Version (SCID-5-CV) is a clinician-administered, semi-structured interview guide for making diagnoses using the *Diagnostic and Statistical Manual of Mental Disorders, 5th Edition (DSM-5)*. The SCID-5-CV covers the DSM-5 diagnoses most often encountered in the clinic, including depressive and bipolar disorders, schizophrenia spectrum and other psychotic disorders, substance use disorders, anxiety disorders (panic disorder, agoraphobia, social anxiety disorder, generalized anxiety disorder), obsessive-compulsive disorder, posttraumatic stress disorder, attention-deficit/hyperactivity disorder, and adjustment disorder. It also screens for 17 additional DSM-5 disorders.

The SCID-5-CV can be used to ensure that the major DSM-5 diagnoses are evaluated, to select study populations, and characterize current and previous psychiatric diagnoses.

The SCID-5-CV is a proprietary instrument and administration requires a license from the American Psychiatric Association:
