

Data Collection Worksheet

Please Note: The Data Collection Worksheet (DCW) is a tool to aid investigators to integrate the collection of PhenX measures in your study. The PhenX measures that you selected and added to your Cart are presented in the DCW in alphabetical order. The DCW includes worksheets for data collection. Variables derived from the collected data are shown in the Data Dictionary (DD) with variable names and unique PhenX variable identifiers. The collection of DCWs produced by the Toolkit is not designed as a data collection instrument. Each investigator will decide how to integrate PhenX measures into data collection for their study.

Before implementing this protocol, it is important to first determine the participant's primary guardian, ensure that the child has contact with the mother when assessing the mother's communication, and that the child has contact with the father when assessing the father's communication. Although the original protocol was implemented with the child's mother, the Working Group agrees that this protocol can be administered to the primary guardian who lives with the child. The protocol text should be adjusted accordingly to denote the relationship of the primary guardian.

1. My mother and I are interested in each other's opinions on smoking

1 completely not true

2 not true

3 sometimes, sometimes not

4 true

5 completely true

2. My mother and I are able to talk easily about our opinions concerning smoking

1 completely not true

2 not true

3 sometimes, sometimes not
