

Data Collection Worksheet

Please Note: The Data Collection Worksheet (DCW) is a tool to aid integration of a PhenX protocol into a study. The PhenX DCW is not designed to be a data collection instrument. Investigators will need to decide the best way to collect data for the PhenX protocol in their study. Variables captured in the DCW, along with variable names and unique PhenX variable identifiers, are included in the PhenX Data Dictionary (DD) files.

The U.S. Tobacco Control Laws Database can be used to generate reports that provide local-level data on tobacco use prevention and control policies related to the following topics:

- 100% smokefree ordinances (non-hospitality worksites, restaurants, bars)
- Preemption of local smokefree air laws
- Excise taxes on tobacco products
- Restrictions on minors' access to tobacco products
- Marketing/advertising restrictions
- Restrictions on other (non-cigarette) tobacco products

To view the latest Smokefree Lists and Maps, and description of Data that are updated on a quarterly basis (January, April, July, and October)
