

Data Collection Worksheet

Please Note: The Data Collection Worksheet (DCW) is a tool to aid integration of a PhenX protocol into a study. The PhenX DCW is not designed to be a data collection instrument. Investigators will need to decide the best way to collect data for the PhenX protocol in their study. Variables captured in the DCW, along with variable names and unique PhenX variable identifiers, are included in the PhenX Data Dictionary (DD) files.

Wechsler Adult Intelligence Scale®, Fourth Edition (WAIS®-IV), is a tool designed to assess an individual's cognitive abilities and is administered by a trained psychologist using a combination of verbal and performance tasks. The WAIS®-IV consists of a core battery of 10 subtests, which focus on specific intelligence domains (perceptual reasoning, processing speed, verbal comprehension, and working memory).

The WAIS®-IV is a proprietary instrument and is available online from Pearson at www.pearsonclinical.com.
