

Data Collection Worksheet

Please Note: The Data Collection Worksheet (DCW) is a tool to aid integration of a PhenX protocol into a study. The PhenX DCW is not designed to be a data collection instrument. Investigators will need to decide the best way to collect data for the PhenX protocol in their study. Variables captured in the DCW, along with variable names and unique PhenX variable identifiers, are included in the PhenX Data Dictionary (DD) files.

Wechsler Preschool and Primary Scale of Intelligence™-Fourth Edition (WPPSI™-IV) is a tool designed to assess a child's cognitive abilities and is administered by a trained professional. The WPPSI™-IV consists of five primary and four ancillary index scales. The primary scales focus on working memory, processing speed, fluid reasoning, and visual, spatial, and verbal comprehension. The ancillary scales focus on general ability, cognitive proficiency, nonverbal, and vocabulary acquisition.

The WPPSI™-IV is a proprietary instrument and is available online from Pearson at www.pearsonclinical.com.
