

Data Collection Worksheet

Please Note: The Data Collection Worksheet (DCW) is a tool to aid investigators to integrate the collection of PhenX measures in your study. The PhenX measures that you selected and added to your Cart are presented in the DCW in alphabetical order. The DCW includes worksheets for data collection. Variables derived from the collected data are shown in the Data Dictionary (DD) with variable names and unique PhenX variable identifiers. The collection of DCWs produced by the Toolkit is not designed as a data collection instrument. Each investigator will decide how to integrate PhenX measures into data collection for their study.

Summary of the Vineland Adaptive Behavior Scales, Second Edition (Vineland™-II)

The Vineland Adaptive Behavior Scales, Second Edition (Vineland™-II) is a parent or caregiver structured interview administered by a trained professional that measures day-to-day performance on communication, daily living, socialization, and motor skills. Standard scores can be derived for communication, daily living, socialization, and motor skills subtests or combined to create an Adaptive Behavior Composite (ABC).

The Vineland Adaptive Behavior Scales, Second Edition (Vineland™-II) is a proprietary protocol and administration requires a license from Pearson, Inc.
